Abstract (en)

[origin: WO2016066151A1] The invention relates to a stocking device (10) for stocking and dispensing products, comprising a structure formed substantially of a container (200) for stocking a product, a dispensing device (100), and comprising an actuating mechanism (300) having an actuating lever (310) for activating and/or metering the removal of product from the container (200) by means of the output device (100), wherein the actuating lever (310) can be pivoted between a first pivoting position and at least a second pivoting position by means of a pivoting device (400). The invention further relates to a method for removing a product from the stocking device (10).
