Abstract (en)

[origin: WO2016066209A1] The invention relates to a high-pressure cleaning system which comprises a high-pressure cleaning device (12) having a high-pressure pump (16) for increasing the pressure of a cleaning liquid, as well as two or more discharge units (48, 52, 56, 60, 64, 70) which differ from one another, discharge said cleaning liquid, and can be brought selectively into fluidic connection with a pump outlet (22) of the high-pressure pump (16), said discharge units (48, 52, 56, 60, 64, 70) being connectible to an operating unit (26) of said high-pressure cleaning system (10), or an operating unit (26) being arranged on at least one discharge unit (48, 52, 56, 60, 64, 70), said high-pressure cleaning system (10) comprising an input unit (96) by means of which at least one conveyor parameter can be specified by a user, this at least one conveyor parameter being able to be set in accordance with the specification by means of a control unit (82, 98) of said high-pressure cleaning system (10), said control unit being coupled to the input unit (96), and said high-pressure cleaning system (10) comprising an output unit (100) which is coupled to the control unit (82, 98) and on which, depending on said user specification, an indication (116) can be provided comprising a recommendation (118, 120, 122) relating to at least one discharge unit (48, 52, 56, 60, 64, 70). The invention also relates to a method for operating a high-pressure cleaning system.
