Abstract (en)

[origin: WO2016066294A1] The invention relates to a grinding machine (10) having at least one first housing part (12), wherein the first housing part (12) comprises a motor housing part (14) and a handle region (16), having at least one machining tool holder (20) which is intended to receive a machining tool (21), wherein the motor housing part (14) is connected to the machining tool holder (20), having at least one lighting device (22) which is intended to illuminate at least a tool environment (24), in particular a work area. It is proposed that the lighting device (22) is arranged on the motor housing part (14) on a side (26) facing the machining tool holder (20).
