Abstract (en)

[origin: WO2016066971A1] The invention relates to a system (1) for preforming a sheet of plastic material (MP), comprising a first element (2) forming a performing tool, characterised in that it includes: a second element (3) designed to be positioned facing the first element (2); a set of pressing means (4), actuated sequentially and borne by the second element (3), in order to apply a pressure locally on the sheet of plastic material (MP), such as to press the sheet (MP) against the first element (2); at least one means (5) for sequentially actuating the pressing means (4).
