Abstract (en)

[origin: WO2016066457A1] The invention relates to a lift system (1) comprising: a lift car (10) that can be moved between storeys (L1, L2, L3) of a building (2); and a video system (4, 6) having a video camera (6) arranged in the lift car (10), and a video monitor (4) by means of which information relating to the inside of the lift car (10) can be displayed. The lift system (1) also comprises a video control device (8) which is communicatively connected to the video system(4, 6), and which controls the video system (4, 6) in a selective manner according to one of a number of operating modes. The video monitor (4) can be arranged on a storey (L1, L2, L3).
