Abstract (en)

[origin: WO2016055320A1] The invention relates to a method for washing textiles in a washing machine (1) that comprises a washing chamber (2) for receiving a washing liquid and textiles to be cleaned, as well as an activation device (3) which has an inlet (4) for supplying washing liquid from the washing chamber (2) into said activation device (3) and an outlet (5) for conducting washing liquid out of the activation device (3) and into said washing chamber (2), and which also comprises at least one activation agent that is suitable for triggering a process for the formation of free radicals in the washing liquid, within said activation device (3), said washing liquid containing an acylhydrazone.
