Abstract (en)

[origin: WO2016066915A1] The invention relates to a vehicle headlamp (1) comprising a mounting (21), a plurality of light sources (2) arranged on said mounting, each arranged such as to emit light, at least one reflector (3) arranged such as to reflect the light emitted by each light source, and thus to form a plurality of light beams, a plurality of lenses (4) each arranged so as to project one of the light beams reflected by the reflector, in which said at least one reflector includes a plurality of recesses (31-34), each recess corresponding to a specific light source and a specific lens and being arranged so as to reflect the light of said specific light source among the plurality of light sources towards said specific lens among the plurality of lenses, and said mounting (21) is arranged between said at least one reflector (3) and the plurality of lenses (4).
