Abstract (en)  
A container 10 having tamper evident and resistant features comprises a tray 14 having a bottom wall 30 and a peripheral side wall 32 extending upwardly from the bottom wall, which collectively define a compartment, and terminating in a tray rib 34 to at least partially define an open top providing access to the compartment. The container further comprises a cover 12 comprising a top wall 16 that terminates in a cover rib 18 having a peripheral cover lip 24, an interference element 70 extending from the container. The cover further comprising a tab 60 associated with the interference element, and at least one line of weakness 62a, 62b coupling the tab to the cover. The tab is moveable between a first position where the line of weakness is not severed and a second position where the line of weakness is severed.
