Abstract (en)  
[origin: EP3214017A1] A package of the present invention includes: a cigarette box (1) which opens and closes and includes front walls (10, 20) of an outer case (2) and an inner case (3) that overlap with each other, the cigarette box (1) further including a removal opening (25) that is opened as a result of the inner case (3) sliding from a closed position to an open position with respect to the outer case (2) and thereby decreasing a degree of overlap between the respective front walls (10, 20); an outer-side magnetic pole group (19) provided on the front wall (10) of the outer case (2) and having an arrangement pattern including S poles (19a) and N poles (19b); and an inner-side magnetic pole group (26) provided on the front wall (20) of the inner case (3) and having an arrangement pattern in which, at the closed position, the positions of S poles (26a) and N poles (26b) are reversed relative to the arrangement pattern of the outer-side magnetic pole group (19).
