Abstract (en)
An ergonomic and compact lifting machine for lifting windows, building elements etc. in connection with fitting or removal. The ergonomic feature of the machine is that it is controlled by a joystick (5). This is located at the rear of the machine so that the operator has full control of the situation. The control devices such as the joystick (5) are adjustable and can be adjusted in height to suit the size of the operator. The joystick (5) can also be adjusted to suit left- or right-handed operators.
