Abstract (en)
A key unit is provided in which a magnet key (22) is mounted on a portable case (23) so that the magnet key (22) can operate between a projecting position in which the magnet key (22) projects from the case (23) and a storage position in which the magnet key (22) is stored in the case (23). Thus, it is possible to enhance the degree of freedom in the design of the key unit having the magnet key.
