Abstract (en)
[origin: CN107152235A] The invention relates to a masking cloth (18), for a shading device. The masking cloth is equipped with a cloth web (16) having two lateral edges (36) in a longitudinal direction (L), two longitudinal strips (40) which are connected with the cloth web (16) along the side edges (36) in respective cloth edge regions (38) and guidance pieces (37) which separately extend with the side edges (36) and are used for guiding the masking cloth (18) on two sides in guide rails (12) on the shading device. The masking cloth is characterized in that the longitudinal strips (40) are transversely elastic over their entire width and the guide elements (37) are fastened to the longitudinal strips (40) along a respective free strip edge (42).
