Abstract (en)  
[origin: WO2016071090A1] The invention relates to a pole handle (1), in particular for trekking poles, Nordic walking poles, Alpine ski poles, or cross-country ski poles, comprising a handle head (2), a handle body (3), and a hook-like device (4) for securing a handling device. A movable, pivotal, or rotatable latching means (5) is arranged in the region of the hook-like device such that a loop-, ring-, or eye-shaped device, which is provided on the handling device and inserted into the hook-like device substantially from above, is fixed in the hook-like device in a self-latching manner. The latching means is designed in the form of a retaining lug which defines a constrained region (7) for the loop-, ring-, or eye-shaped device towards the bottom in the braced position. Additionally, a recess (8) is provided in the handle head and/or handle body from above, wherein a movably and/or rotatably mounted securing block (9) on or in which the engaging means is arranged is arranged in the recess.
