Abstract (en)

[origin: WO2016071858A1] Described is a cooking vessel for induction hobs, comprising a concave containment body (2) provided with at least one bottom wall (2a) having a first face (3a), facing the inside of the concavity (C), and a second face (3b), opposite the first face (3a) and facing the outside of the concavity (C), a metal mesh (4) made of magnetic material, constrained to the second face (3b) of the bottom wall (2a) and facing the outside of the concavity of the containment body (2) and at least a sheet (5) of material with high thermal conductivity interposed between the second face (3b) of the bottom wall (2a) and the metal mesh (4) constrained to it, wherein the metal mesh (4) is at least partly embedded in the sheet (5).
