Abstract (en)
[origin: WO2016042381A1] The invention relates to a method and plant (1) for the treatment of trimmings (R) from sheet material, comprising a pipe (2) of transporting air defined by perimetric walls (21), in which rotating paddles (3) are assembled, destined for generating a flow of air for transporting said trimmings (R) in the pipe (2), wherein the plant comprises: - a first rotating blade (41) - a second fixed blade (42) a third blade (43) alternatively rotating or fixed suitable for effecting a shredding of the trimmings (R) by shearing and wherein the rotating blades are positioned integrally with the rotor of the paddles and the fixed blades are fixed integrally with the perimetric walls.
