Abstract (en)

[origin: WO2016071039A1] The present invention relates to a method for producing an arrangement (1) comprising a tubular body (2) and a component (3) connected to the tubular body (2). A simplified production of the arrangements (1) and/or an improved resistance of the arrangement (1) results in that the tubular body (2) and/or the component (3) is provided with an adhesion promoter (8) for improving the adhesion of the component (3) to the tubular body (2) and the component (3) is subsequently attached to the tubular body (2). The invention further relates to such an arrangement (1) and a temperature control device (10) comprising such an arrangement (1).
