Abstract (en)
[origin: WO2016071721A1] Provided herein is an image display assembly (200) comprising: a base having a front face for securing an image or other display material for display, and a non-image face, the non-image face comprising a plurality of linear v-grooves (212), wherein the plurality of linear v-grooves segment the base into one or more foldable segments (222, 224) that upon folding of the segments assemble the base into a support structure comprising a plurality of corners, thereby forming an assembled base comprising at least one image display face formed from at least a portion of the front face. Also provided is an assembled image display, a method of creating an image display and use of an image display assembly to create an image display.
