Abstract (en)

[origin: CA3015949A1] The subject of the present invention is a care item (1) for cleaning a determined surface comprising a three-dimensional textile component (2) of unit knit construction, comprising a first knitted textile layer (3) and a second knitted textile layer (4) which are connected by connecting threads (5) extending between the first textile layer (3) and the second textile layer (4). The first layer (3) comprises, on its external face (3a) referred to as the cleaning face, microfibres, and possibly scratching fibres with a count greater than 1 dtex, and the connecting threads (5) form a water-absorbing intermediate layer (7).
