Abstract (en)
[origin: WO2016075323A1] The present invention relates to a requisite (10) for application of a cosmetic product, comprising: a heating device (14) having a heating end (26), an applicator (18) suitable for being removably mounted on the heating end (26), the applicator being suitable for being heated by the heating end (26). The applicator (18) comprises a stem (72) intended to be placed in contact with the heating end (26) and an end piece (74) covered with a layer (76) of a solid cosmetic product, the cosmetic product layer (76) entirely covering the end piece (74) over at least a part of the length of the end piece (74) taken from a free end (78) of the end piece (74), the cosmetic product layer (76) being suitable for being applied on a body surface by heating the end piece (74) across the stem (72).
