Abstract (en)

[origin: WO2016056032A1] An assembly for containment, filing and storage (1), comprising at least one container (2), of the type of a cabinet, defining inside it a compartment (3) for accommodating products of various nature. The container (2) is slideable between a configuration of resting on a facing surface upon being opened in order to gain access to its inner compartment (3) and a configuration of separation from such surface. The at least one container (2) comprises, along its walls, at least one respective paneling (4) made of thermally insulating and fire-resistant material; the inner compartment (3) of the container (2) comprises at least one frame (5) for the orderly arrangement of the products.
