Abstract (en)

[origin: WO2016074012A1] The invention relates to a device for securing floating bodies (1, 1') with a pile (2) that can be fastened at one end to a base (G), wherein the floating body (1, 1') can be secured in the region of the other end thereof. In order to create advantageous securing conditions, it is proposed that the pile (2) is designed as a telescopic tube (3).
