Abstract (en)

[origin: WO2016075558A1] The invention includes a packaging container comprising a generally pyramid- shaped body with a top and a base and including a waistband which fits over the top and into a position in which it abuts the sides of the body, wherein the waistband can be separated from the body and the body inverted and placed thereon so that the waistband forms a pedestal for supporting the body in an inverted fashion. The invention further includes methods for displaying foodstuffs and transporting foodstuffs with the packaging container described.
