Abstract (en)  
[origin: WO2016074711A1] The aim of the invention is to improve a beverage preparation device comprising at least one fluid inlet, a beverage dispensing device comprising at least one beverage outlet, a fluid line network which fluidically connects said at least one fluid inlet to the at least one beverage outlet, and a housing such that, in particular the construction and maintenance thereof is simplified. According to the invention, the housing comprises an upper housing cover and a valve support is arranged below the housing cover, on which at least two control and/or regulating valves of the beverage preparation device are arranged, said support being freely accessible after removing the upper housing cover.
