Abstract (en)
[origin: WO2016074661A1] The invention relates to a system laying panel and to an associated system surface covering. Said system laying panel comprises a base body (1) having a multi-layer structure. The base body has at least one panel-like or block-like wood layer (2), the top side (2.1) of which forms the running surface of the system laying panel, and a supporting layer (3), the bottom side (3.2) of which forms the contact surface of the system laying panel. The wood layer (2) is connected to the supporting layer (3) directly or by means of at least one further intermediate layer (4). Especially advantageously, the supporting layer (3) has at least one plug connection means (5) that is firmly integrally formed on the periphery, at least one further plug connection means (5.1) that is detachably integrally formed, and recesses (7), which correspond to the plug connection means (5, 5.1) and which are likewise arranged on the periphery.
