Abstract (en)
[origin: EP3219224A1] A cosmetic device (1) for cosmetic liquid is provided comprising a container (2) defining a containment volume (2a) of the cosmetic liquid, and an access mouth (2b) to the containment volume (2a); an applicator (4) suitable to withdraw the cosmetic liquid from the containment volume (2a); a rod (5) having a perpendicular cross-section with a non-circular edge and one end integral with the applicator (4); a cap (3) connected to the rod (5) on the side opposite the applicator (4) and suitable to engage the container (2) with a rotation along a longitudinal axis (1 a) closing the access mouth (2b) and placing the applicator (4) and the rod (5) in the containment volume (2a); connection means (6) of the cap (3) to the container (2) by means of a mutual rotation of the cap (3) and of the container (2); a scraper (7) connected to the container (2) at the access mouth (2b) and comprising a mobile portion (71) defining a sliding opening (7a) counter-shaped to the perpendicular cross-section of said rod (5), the mobile portion (71) being rotationally connected to the rod (5) along the longitudinal direction (1 a), and a fixed portion (72) integral with the container (2) and suitable to block the translation of the mobile portion (71) in at least one direction towards along the longitudinal direction (1 a).
