Abstract (en)
[origin: WO2016016058A2] The invention relates to a container (10) into which goods can be introduced, comprising a flexible cover (11) which comprises at least one main opening (12) and a cavity (13), designed such that goods can be introduced into the cavity (13) via the main opening (12), also a closure device (50) which is provided on the covering (11). Said closure device (50) comprises a recloseable opening (53) which allows the cavity (13) to be accessed when the main opening (12) is closed.
