Abstract (en)

Door fittings comprising an indoor door shield and a outdoor door shield that are connectable to each other with screws that are placeable in an upper part, a middle part, and a lower part of the door shields, wherein heads of the screws are located at the side of the indoor door shield and forward ends of the screws extend towards the outdoor door shield, and wherein the outdoor door shield is provided with a longitudinal slit or slits, wherein each slit is equipped to receive a flange that is slidable in the slit, and wherein said flange supports a bushing protruding from the flange, which bushing is equipped to receive a forward end of a screw.
