Abstract (en)  
A door latch device (20) for the vehicle includes a main body (22), a lever member (28, 29) configured to release engagement between an engaged portion (100) and an engagement portion (27), a transmission cable (30, 31) including an outer casing (32) and an inner cable (34), the inner cable (34) being provided within the outer casing (32) and having a distal end portion (34a) that is exposed from the outer casing (32) and that is connected to the lever member (28, 29), the transmission cable (30, 31) being configured to drive the lever member (28, 29) by transmitting an operation force applied from a door handle (15, 16) to the lever member (28, 29), a cover member (40) covering the inner cable (34) exposed from the outer casing (32), and a seal member (50) sealing at least the upper portion of the attachment portion between the cover member (40) and the main body (22).
