Abstract (en)

[origin: CN107204244A] The invention relates to a toggle attachment (2) for reducing the operating force on an operating element (1) of a switching device, wherein the toggle attachment (2) has a housing with a recess. The circuit breaker is characterized in that the toggle attachment (2) fastening means (16) which are designed such that, if necessary, a disassembly of the toggle attachment (2) from the operating element (1) is possible.
