Abstract (en)
[origin: WO2016078892A1] The invention relates to a rack (10, 10', 10'') for a domestic dishwasher (1), having a frame (12) and a base (13), which can be swung out in order to increase a loading volume of the rack (10, 10', 10''), wherein the base (13) has at least a first portion (14), which is articulated on a first side (16) of the frame (12) by means of at least a first articulation (15), and a second portion (18), which is articulated on the first portion (14) by means of at least a second articulation (17) and is articulated on a second side (20) of the frame (12), said second side being located opposite the first side (16), by means of at least a third articulation (19), wherein at least one of the portions (18) is intended to alter in length between its respective articulations (17, 19).
