Abstract (en)

[origin: WO2016079289A1] The invention relates to a hand-held tool transmission closure having a base body for closing a transmission housing opening of a transmission housing of a hand-held machine tool, in particular a drill hammer or a combi-hammer, wherein the hand-held machine tool transmission closure comprises an air channel, through which air can flow into and out of the transmission housing, and wherein the hand-held machine tool transmission closure comprises a pressure valve arranged in the air channel, via which an excess pressure occurring in the transmission housing can be reduced.
