Abstract (en)

[origin: WO2016113098A1] The invention relates to a method for blocking (13) and signaling a track section equipped with axle counters (3, 4) to people (1) working in the track section. In order to achieve secure blocking (13) in sections having axle counter systems (3, 4, 5), according to the invention the output signal of at least one of the axle counters (3) adjacent to the track section is adjusted or configured such that the blocking (13) of the track section is effected on the signal box side (6), wherein the blocking (13) is fed back and signaled to the track section.
