Abstract (en)  
[origin: WO2016080832A1] A hold offloading system comprises a holding space (10) for containing a material; and a localized fluidization-suction-pump-drive system (12) for locally fluidizing the material and transporting the fluidized material out of the holding space. The fluidization-suction-pump-drive system (12) includes a fluidization portion (14) and a suction head (16) in proximity to the fluidization portion for suctioning the locally fluidized material.
