Abstract (en)
[origin: WO2016079030A1] There is disclosed a tobacco industry product container (4) comprising a base portion (700) defining a cavity (760), a tray (500) for receiving tobacco industry products, wherein the tray (500) is linearly movable in the cavity (760) in a first direction relative to the base portion (700) from a first position, at which a part of the tray (500) is at a first location in the cavity (760), to a second position, at which the part of the tray (500) is at a second location in the cavity (760) and a limiter for preventing linear movement of the tray (500) in the first direction relative to the base portion (700) beyond the second position, wherein the tray (500) is tiltable relative to the base portion (700) when the tray (500) is at the second position.
