Abstract (en)  
[origin: WO2016079325A1] An applicator (3) for applying an eye-liner, extending along a straight longitudinal axis, and comprising: - an application member (6), in particular an applicator tip, - a support (5) carrying the application member (6), extending along an exposed length (L2) measured along the longitudinal axis of the applicator, - a handle (10) defining a gripping surface allowing the user to hold the applicator when applying the product, the handle (10) having at least one cross-section, considered perpendicularly to the longitudinal axis of the applicator, with a substantially triangular general shape, and the handle extending along a length (L1) measured along the longitudinal axis (X) of the applicator, - the ratio L1/L2 of the length of the handle (L1) to the exposed length of the support (L2) being greater than 2, being preferably between 2 and 7, and more preferably still between 3 and 6, - the handle (10) having at least two cross-sections, separate from each other, with a substantially triangular general shape, the two cross-sections with a substantially triangular general shape being angularly offset relative to each other.
