Abstract (en)

[origin: WO2016081317A1] An assembled fence includes a transverse bar, a vertical bar having an M-shaped cross section, and a clip, wherein the clip is an elastic non-metal clip. Due to the installation of the elastic non-metal clip, all fence parts, including the clip, can be assembled in the assembly site; the clip which does not need to be assembled in the vertical bar in advance will not be damaged and is free from a problem of scratching other parts such as the vertical bar in a transportation process; and the non-metal clip is low in cost.
