Abstract (en)

[origin: WO2016078850A1] A roller blind of the type with adjustable slats, which can be installed on at least one guide (33) even of the universal type, that is, on guides already installed for moving slats and in situ, comprises slats (30) which are connected to each other, with freedom to oscillate in an angular fashion, sliding on standard guides (33) with the possibility of rotation of the slats.
