Abstract (en)

[origin: WO2016079174A1] The invention relates to a method and to a device for detecting radiated light (3) from a security document (3), wherein the device (1) comprises at least one optical waveguide body (4), the optical waveguide body (4) comprises or forms at least one optical waveguide channel (6), the optical waveguide channel (6) comprises an inlet (7) and at least one first outlet (7), the wall surfaces (9, 9a, 9b) that enclose the optical waveguide channel (6) are completely reflective, and the optical waveguide body (4) is designed without any lenses, and to a method for producing the same.
