Abstract (en)

[origin: WO2016079381A1] A solution for testing communication networks and devices comprises receiving (300) packets; dividing (302) the received packets into one or more flows on the basis of one or more parameters of each packet; dividing (304) one or more packets of the one or more flows into smaller packets according to flow specific rules and transmitting (306) the packets of the one or more flows.
