Abstract (en)
A combined mop 100 is provided, which comprises a mop rack 120, a handle 110, a mop head 130, a dust collector 140, and a steam cleaner 150, wherein the dust collector 140 and the steam cleaner 150 are respectively connected with a power supply, and are detachably disposed on the mop rack 120. The mop rack 120 is provided with a channel, and the channel is communicated with the mop head 130 and the dust collector 140 or a steam cleaner 150. The dust collector 140 and the steam cleaner 150 are detachably disposed on the mop rack 120. The dust collector 140 or the steam cleaner 150 can be cooperatively used together with the mop rack 120, the handle 110, and the mop head 130, thereby improving the cleaning efficiency. Moreover, the dust collector 140 and the steam cleaner 150 allow the user to conveniently disassemble them from each other to separately use them, which can increase the application range of the combined mop 100.
