Abstract (en)
[origin: EP3222552A1] Aspects of the disclosure relate to a carton for packaging one or more articles. The carton includes a tubular structure having a plurality of outer walls defining an interior volume for receiving one or more articles. The plurality of outer walls includes a top wall. The carton has a carrying handle. The carrying handle includes a first handle panel hingedly connected to the top wall by a first hinged connection. The carrying handle includes a second handle panel hingedly connected to the first handle panel by a second hinged connection. The carrying handle includes a handle opening formed in at least one of the first and second handle panels. The carrying handle is foldable about the first and second hinged connections so as to be arranged in a stowed position over the top wall.
