Abstract (en)
A system (10) is described for the management of a parking (1) comprising a plurality of parking places (2) for vehicles (3), and a numberplate detector (4) designed to read the numberplate (8) of vehicles (3) parked in said plurality of places (2), said system further comprising a control unit (5) designed to receive said numberplate (8) read by said numberplate detector (4) and transmit it to a parking recording server (S), said control unit (5) being further designed to transmit an end-of-parking message to said server (S) when said numberplate (8) is no longer detected by said numberplate detector (4). It is further described a method for the management of a parking provided with a plurality of parking places (2) for vehicles (3), comprising the steps of: a) reading the numberplate (8) of the vehicles (3) parked in said plurality of places (2) by means of a numberplate detector (4); b) transmitting said numberplate (8) read in said step a) to a parking recording server (S); c) transmitting an end-of-parking message to said server (S) when said numberplate (8) is no longer detected by said numberplate detector (4).
