Abstract (en)  
[origin: WO2016083463A1] The invention relates to an oral pouched product, such as an oral pouched smokeless tobacco product, comprising a filling material, such as tobacco plant material, and a pouch enclosing the filling material, said pouch being made of a viscose material comprising staple fibres of viscose, wherein at least 25% of the staple fibres of viscose by weight have a linear mass density within the range of from 2.5 to 5 decitex and optionally a multilobal fibre cross-section with at least three lobes, such as a trilobal fibre cross-section.
