Abstract (en)

[origin: CA2968199A1] The invention concerns a footwear article (20, 21), provided with means (40) for removably holding or attaching an object (50), characterised in that said means (40) are arranged in such a way that the inconvenience caused by the presence of said object (50) when using said means (40) of said article (20, 21), which is itself in use on the foot, ankle or leg of a user, is significantly reduced. According to the invention, the longitudinal median axis (51, 41) of said object (50) and/or of said means is/are located on the rear area of the inside (18, 29c, 29d) or on the front area of the outside (19, 29a, 29b) of the ankle/of the footwear article (20, 21). The invention provides a novel storage space for an object such as a Smartphone.
