Abstract (en)  
[origin: WO2016083453A1] The invention relates to a portable roller compactor for compacting waste that is located in a container, which is open on the top, having a frame-like basic structure (10) and an articulated arm (23), one end of which is supported by the basic structure (10), and the other, free end of which supports a roller compactor that essentially can be rotated about a horizontal axis of rotation. The roller compactor is characterized in that the articulated arm (23) is pivotably attached to a sliding carriage (20), which is mounted on the frame-like base structure (10) and can be moved in a longitudinal direction.
