Abstract (en)
[origin: WO2016083558A1] The invention relates to a doctor blade chamber support (202, 302) in a printing press for fastening a doctor blade chamber (101, 201, 301) which, in a printing position, cooperates with a dosing roll (102). In order to reduce maintenance efforts on the inking units known especially in flexographic printing, the doctor blade chamber can be secured to the doctor blade chamber support using a magnetic force.
