Abstract (en)

[origin: WO2016083323A1] The invention relates to an arrangement for handling bulk containers (19), comprising a steel frame construction consisting of steel carriers (4, 5, 10, 11, 12, 13, 14) welded to each other, which can be coupled to a load-bearing unit (2, 22) of a container-conveying device (1, 21) and on which a device for receiving the container (19) is arranged, said device allowing the container (19) to be emptied by rotation.
