Abstract (en)

[origin: WO2016083112A1] Disclosed is a method of cleaning fabrics having oily stains thereon. The method comprises a first step of applying one or more fatty acids to a stained portion of the fabric in which step there is no contact of said stained portion with any surfactant. There is a second step of washing the stained portion in wash liquor comprising a detergent composition. In the first step, a monoglyceride is applied to the stained portion simultaneously with the one or more fatty acids wherein said stained portion is treated with a pretreatment composition containing said one or more fatty acids and said monoglyceride and wherein said composition comprises a mixture of fatty acids containing 60 wt% to 90 wt% oleic acid, the balance being either stearic or palmitic acid or a combination thereof.
