Abstract (en)
[origin: WO2016082825A1] The invention relates to a portable barrier for a crowd containment device; said barrier (1) comprises a horizontal base subassembly (2) and a fence (4) that is secured to the base subassembly (2); the base subassembly (2) includes a frame that delimits compartments which are filled with plate-shaped components. The base subassembly (2) also includes at least one holder (6) on which an extension arm (5) can be blocked; in the blocked state, said at least one extension arm (5) is suitable for shifting a tipping point of the barrier (1) in the direction of the at least one extension arm (5).
