Abstract (en)  
[origin: EP3226091A1] An integrated monitoring control apparatus (30) includes a process definer (321) to indicate a correspondence between a classification ID included in status information indicating status of the monitoring control device (20, 20a, 20b, 20c) or status of an equipment (10) subject to monitoring by the monitoring control device (20, 20a, 20b, 20c) and a process performed on the status information, a receiver (310) to receive the status information transmitted from the monitoring control device (20, 20a, 20b, 20c), and a process controller (320) to cause performance, on the status information received by the receiver (310), of the process determined by the process definer (321) based on the classification ID included in the status information.
